

Expanded and Improved Illumina® Family

The Illumina® family is getting a make-over with new products, improvements and options. The first update you'll notice is that the lens has been improved to reduce glare and the standard is a new frosted lens.

Now, onto the new products:

BS100 LED 2' – The BS100 LED 4' has done very well, so Beghelli decided to expand the collection by adding a 2'. This vapour-tight is built for longevity and is easy to install.

BS100 LED 2' PLUS – This luminaire is small, but performs big. Compact in 2' housing, the BS100 LED 2' PLUS performs just like a 4'. Making it the most efficient choice.

BS100 LED-PG 2' PLUS PG – This is just like the 4' model, but in a smaller housing and designed exclusively for parking garages..

BS101 LED – The economical BS101 LED IP65 vapor-tight provides protection in a narrow housing. The tool-less design makes installation easy and can be done with just one person.

BS101 LED ECO – The BS101 LED ECO is the lower output and more economic version of the BS101 LED.

BS100 LED-PG – This BS100 fixture is unique because it is specially optimized and DLC listed specifically for parking garages. This product can also easily replace any existing florescent strip lights in parking garages.
