

Get our Thermal MultiMark Printer for \$1.00!

Weidmüller Special Offer

Let's connect

We offer you professional solutions with the Weidmüller Marking System

Our marking systems can be used to quickly and reliably label terminal markers, wire and cable markers, device markers and labels. The THM MMP is a robust and modular thermal transfer printer which is particularly beneficial when processing continuous materials. The optional cutting and perforation function enables continuous materials to be cut to any length, making work easier when trimming, and allocating the identification areas.

**Offer valid
2.4.19
to
6.30.19**

Take advantage of our offer
