

## ABB variable speed drives for high quality food and beverage production

Our portfolio for quality and freshness

Each day you face the demands of tight delivery times, high quality standards and safety. You also need to operate efficiently, even 24/7. Everything counts. We understand these needs. Drives and LCs help you run your food and beverage applications, from raw material handling, to processing and conveying, to packing and storage, without compromising on the standards you demand.

We can help, call.
