

## Video of the Month

### Decentralized Automation

Check out the new video covering how modular machines benefit from decentralized automation. Decentralized automation allows automated machines and plants to fulfill their potential and achieve efficiency. [Click here to watch the video.](#)

# Product Spotlight

## Managed Ethernet Switch with IP67

### Benefits

- Higher clock rates thanks to high-speed link-up function
- Maximum security with NAT routing and an integrated firewall
- Easy installation directly in the field
- Reduced product variance with multiprotocol Ethernet standard
- Highest availability due to broadcast storm protection and network load monitoring

### Key Functions

- 10-port Switch with IP67 protection
- GBit high-speed backbone
- 8 x 100-Mbit ports
- NAT Routing
- Port-based IP address assignment

# Division Updates – The Latest in Sensors, Connectivity and Fieldbus Technology

## Sensors

### Line Extension: Inductive Uprox Washdown Sensor with IO-Link

Turck's portfolio of inductive washdown sensors for the food and beverage industry now includes an IO-Link-enabled variant. This rugged IP68/IP69K-rated sensor has adjustable diagnostics and configurable set-points that can be programmed via IO-Link. These sensors are ideal for applications where there is high moisture such as food and beverage processing, canning and parts manufacturing.
