

Low voltage switchgear and motor control center

About MNS and electrification solutions

ABB's electrification solutions business is a market leader in power distribution and motor control solutions, connecting power and automation through the MNS[®] switchgear platform for process industry, power and infrastructure customers. As the world's largest low voltage switchgear OEM with unmatched domain expertise and local support in more than 30 countries, ABB electrification solutions is truly your local partner.

At the core of ABB's electrification solutions business is the MNS solution platform which has been evolving for over 40 years. Since its inception in the 1970's the MNS design has been based on the fundamental principles of safety, reliability and scalability. In addition, ABB also offers the extended low voltage ReliaGear[®] in the United States and Canada. ReliaGear provides world-leading ABB circuit breaker technology and it has American National Standards Institute (ANSI) certification.

With millions of vertical sections currently installed globally and 10's of millions of functional units in service, ABB's global electrification solutions team combined with the MNS range of solutions is well positioned to meet your project requirements. Find out more call;
